

# ABACUS Data Editor™

## Datasheet

### MANY HANDS MAKE LIGHT WORK.

ANCIENT PROVERB

*Crystal clear answers to questions too painful to ask:*

How do I keep the repository up to date?

—

Can we support change management?

—

Is ABACUS for enterprise modelling, CMDB or both?

—

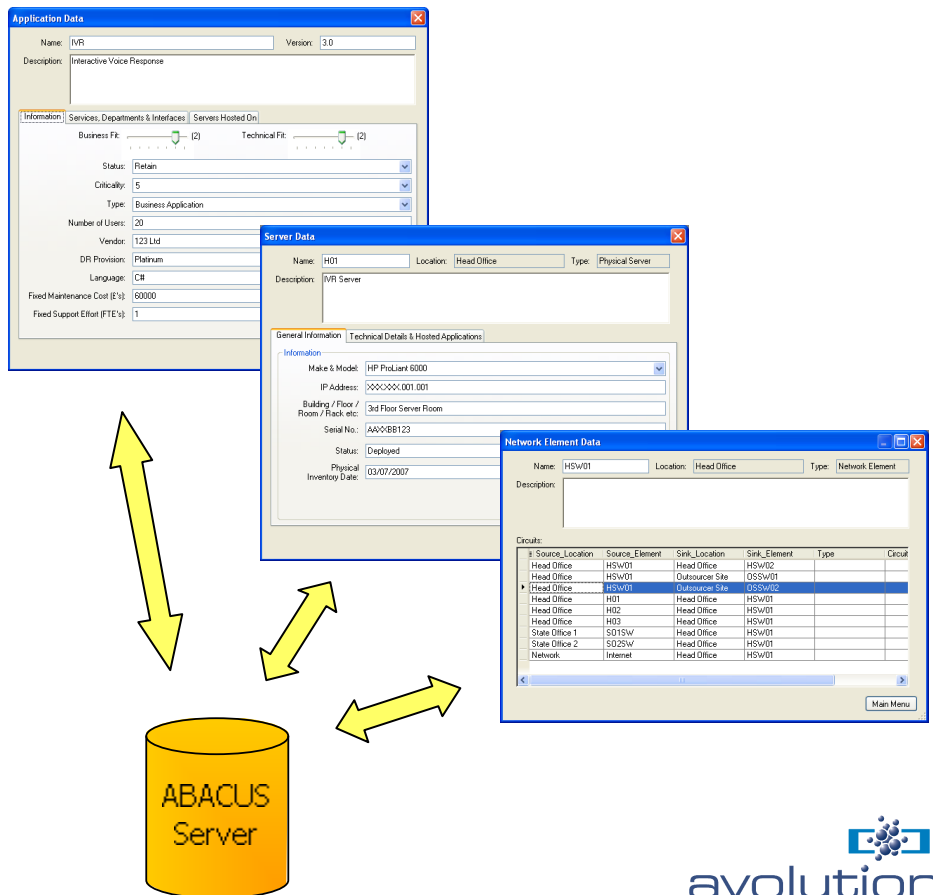

What about ITIL?

—

How do I effectively work with an outsourcer?

**ABACUS Data Editor** is a low-cost compliment to **ABACUS Standard** for users who wish to manage repository data through simple forms and tables or lists. **ABACUS Data Editor** is typically used by a broad user group within the organisation to help maintain the currency of the repository in support of the core modelling team. Together with other ABACUS Suite products — **ABACUS Standard**, **ABACUS Professional**, **ABACUS Designer**, **ABACUS Enterprise Edition** and **ABACUS Publisher** — **ABACUS Data Editor** provides the most flexible and feature-rich enterprise modelling environment on the market today.

### MANAGE DATA THROUGH SIMPLE FORMS AND TABLES

## MANAGE DATA THROUGH SIMPLE AND EASILY CUSTOMISABLE FORMS

**Application Data**

Name:  Version: 3.0

Description: Interactive Voice Response

Information | Services, Departments & Interfaces | Servers Hosted On
